AHMED HASSAN

.Net Developer

About Me

I'm a junior backend developer passionate about solving problems and delivering high-quality code. With expertise in ASP.NET Core, C#, and SQL Server, I've worked on several impactful projects and continually strive to learn and contribute to exciting technologies

My Work

SchoolBookShop

Pharmcy System

What I Do

Front-End Development:

- Task: Design and implement the user interface of a web application.
- Example: Create responsive web pages using HTML, CSS, and JavaScript frameworks like React or Angular to ensure a seamless and interactive user experience.

Back-End Development:

- Task: Develop the server-side logic and database interactions.
- Example: Build RESTful APIs using ASP.NET Core, manage data with Entity Framework Core, and implement secure authentication and authorization.

Integration and Deployment:

- Task: Integrate front-end and back-end components and deploy the application.
- Example: Connect the user interface with the server-side logic, configure continuous integration/continuous deployment (CI/CD) pipelines, and deploy the application to cloud platforms like Azure or AWS.

Skills

C#   SQL   LINQ   EF Core

ASP .NET Core   ASP .NET Core MVC   HTML   CSS   Java Script
